Dr. Tarun Chaudhary	tchaudhary@gatech.edu	By Appointment

---

## General Course Information

---

### Description

This is a seminar-style course that focuses on the history, institutions, people, and processes of intelligence. The course critically examines the role of intelligence as a component of national and international security policy. What is the relationship between policy makers and the intelligence community? What is the intelligence community and how is intelligence produced and utilized?

### Course Goals and Learning Outcomes

1. *Problem Solving in International Affairs:* Students will be able to use their knowledge of international affairs in a practical problem-solving way to address issues of immediate international concern.

For this course, that includes

- 1) Demonstrate how the intelligence enterprise contributes to the policymaking process,
  - 2) Understand the role of intelligence in historical and current international security situations,
  - 3) Demonstrate a working knowledge of the role of intelligence, the intelligence community, technology, and the institutions in addressing security challenges facing the United States,
  - 4) Analyze the factors, events, and changing nature of the threat that influenced United States intelligence and national security policy,
  - 5) Understand how modern technology influences intelligence and consider how future developments in this realm may affect the intelligence community and process.
2. *Effective Communication Skills:* Students will be able to express their arguments clearly and effectively both in written reports and in their research and oral presentations.
  3. *USG BOR Social Science General Education:* Students will demonstrate the ability to describe the social, political, and economic forces that influence social behavior

---

## Course Requirements & Grading

---

Through a focus on intelligence and policy along with class discussions and assignments, this course will help build and refine your critical thinking and presentation skills. You will be graded on a variety of work that includes three intelligence briefs (each worth 10% of your grade), an essay (15% of your grade) on a topic that I will approve, and the presentation of that topic to the class (15% of your grade), and on two assignments (15% each) that we will co-create. This is a chance for you to participate in the structure and content of the class by defining what you want to learn and how you will be evaluated on that content. Once we have collaborated to develop and finalize those activities, I will revise the syllabus to include the

specific information. Please also note that a portion of your final grade will consider your participation across the class, assignments, and activities (10 % of your grade). Grad students enrolled in INTA 8803 will substitute a longer form research paper on a topic we will agree on that they will present to the class instead of the essay. The due dates for these assignments will be determined by us collectively during the first class, the syllabus will be updated with the final dates.

Assignment	Date	Weight
Intelligence Brief 1 Intelligence Brief 2 Intelligence Brief 3	Brief 1 due before class on week 3. 2 and 3 TBD	30%
Essay and Presentation on Approved Topic	TBD	30%
TBD by class co-creation on day 1	TBD	15%
TBD by class co-creation on day 1	TBD	15%
Class Participation	N/A	10%

### Extra Credit Opportunities

During the semester, there may be opportunities for extra credit. For example, these opportunities could consist of attending local events or lectures pertinent to course topics and presenting your experience and what you learned to class via a short briefing. This sort of extra credit or other extra credit opportunities will be offered at my sole discretion.

### Grading Scale

Your final grade will be assigned as a letter grade according to the following scale:

A	90-100%
B	80-89%
C	70-79%
D	60-69%
F	0-59%

Each class assignment will be given a grade on scale above and weighted accordingly to produce your final grade for the class. We will discuss the grading criteria associated with each assignment in the first few classes and well ahead of due dates.

---

## Course Materials

---

### Course Text

1. Mark M. Lowenthal, *Intelligence: From Secrets to Policy*, CQ Press, 2022. Make sure you have the latest/9th edition.

### Course Website and Other Classroom Management Tools

Additional course material will be posted on the class Canvas site. We may also utilize the Canvas site for discussions and other logistics.

---

## Course Policies, Expectations, & Guidelines

---

This is a seminar style course that requires students to engage in active discussions. In order to do so, you should come to class prepared having read the materials assigned. Your participation is both necessary for your success and that of your fellow students. Ten percent of your grade will be contingent on your active participation as judged through engaging during class discussions and activities. Importantly, we will try to make class-time as engaging as possible with a mixture of lecture and presentation, active discussion, and time devoted to working on essays and intelligence briefs both individually and collaboratively. It is the expectation that all students help contribute to a collaborative and constructive learning environment. This course will help develop your skills as an analyst and briefer, a skill set that is important and sought after in professional environments. This may mean your work will be critically examined and commented upon by both me, the instructor, and your peers. Constructive criticism will be welcomed and is encouraged, however impolite or unconstructive comments that are mean spirited, flippant, and not aligned with the collegiate environment we are building will not be tolerated. This class can be fun while also academically enriching, I sincerely hope you will help me ensure that outcome!

### Attendance

Attendance is necessary but in cases where you are not able to attend class, please email [tchaudhary@gatech.edu](mailto:tchaudhary@gatech.edu) as soon as possible so we can discuss exceptional circumstances ahead of your absence. In cases where we are unable to discuss your absence beforehand, please schedule time for us to discuss the absence outside of class time as soon as possible. Reasonable accommodation can be made for various circumstances, however, please do not abuse my good nature and that of your fellow students. You can miss up to two classes (but not those where you are scheduled to present) for any reason before your grade will be impacted, though I reserve the right to revisit this policy depending on both individual and overall class participation and performance.

### Academic Integrity

Georgia Tech aims to cultivate a community based on trust, academic integrity, and honor. Students are expected to act according to the highest ethical standards. [Review Georgia Tech's Honor Code](#) and the [student Code of Conduct](#).

Any student suspected of cheating or plagiarizing on an assignment will be reported to the Office of Student Integrity, who will investigate the incident and identify the appropriate penalty for violations.

Much of your graded work will be via assignments that require you to write. These written assignments are your chance to practice and demonstrate your critical analysis skills, your communication skills, and your understanding and mastery of course content. We will discuss the use of AI tools both as an emerging issue in the practice of intelligence and as it may or may not apply to your assignments. This discussion will help you understand how you should or should not use such tools for any particular assignment.

### Accommodations for Students with Disabilities

If you are a student with learning needs that require special accommodation, [contact the Office of Disability Services](#) (404-894-2563) as soon as possible to make an appointment to discuss your special needs and to obtain an accommodations letter. Please also e-mail me as soon as possible in order to set up a time to discuss your learning needs.

## Collaboration & Group Work

There will be various assignments and activities that will require collaboration and group work during the semester in addition to the assignments you must complete on your own. While there is not a formal measure of your contribution, each student should engage in group collaboration and lack of effort will be addressed if necessary.

## Extensions, Late Assignments, & Re-Scheduled/Missed Exams

Generally, late assignments without documented excuse as outlined in Georgia Tech official policy will not be accepted. Major exception: similar to what is noted in the syllabus about attendance, if you have a scheduling conflict that will prevent you turning an assignment in on time, please contact me before the assignment is due.

## Student Use of Mobile Devices in the Classroom

It will be useful to have a laptop that you bring to the classroom, we may utilize laptops in classroom activities, and you may choose to take notes on your laptop or other device during class. That being said, I may ask that laptops be closed during discussions or other activities if I feel students are distracted or that the devices are causing other issues. While I understand that we all may need to have our phones with us, please keep them silent during class. Reasonable exceptions can be made for those that may need to monitor phones/messages due to work or personal reasons. However, generally, please do not interact with your phone during class time and limit your use to break periods.

---

## Course Schedule

---

*Important Note: The topics and readings listed on this course schedule may change based on a number of evolving factors. There may be guest speakers that will replace or partially replace the discussion and activities scheduled for a few of the dates below. Additionally, depending on class interest, current events, and emerging opportunities, the topics may be re-organized or different topics may be included. These changes will not happen without notice being given first, and the official syllabus will be revised and kept updated. My hope is this class can adapt to areas of interest to you and your peers and we can collaborate to create a dynamic, engaging, and enriching learning experience.*
